Projects

1.Codeial Project is a professional chat app built with Node.js, AJAX, SASS, and EJS. It offers real-time communication, scalability, and smooth user experience. With dynamic updates and stylish customization, Codeial is a robust and modern platform for seamless collaboration. Other project includes: Using react Chatbot, album-listing, Hospital API and Employee review system.

2.Worked on Smart Irrigation System Using IOT which helps in management of water and maintaining soil humidity as per the requirement before watering the plants.

3.Worked on Augmented Reality Using QR Code in which attendance is recorded using QR Code on cell phones of students on the daily basis.
